

## Ultra Sound and Imaging Equipment's

- Power supply units to Storage drives and board printer in ultrasound and imaging equipment's would find scope for wire to wire and wire to board applications.
- These interconnection requirements, will find our below Minitex Pwr variants useful.
  - [2.5mm, 6.5 Amp compact connectors](#)
  - [3mm standard & Blind mate connectors](#)

## Defibrillator & Ventilators

- Power supply boards and distribution units inside these applications will have requirements for wire to board requirements.
  - [3mm, BMI and standard WTB Headers and Cable assy for 600V 9 Amps](#)

## Patient Monitoring Equipment's

- Power supply units in Health monitoring systems would find scope for mid power wire to board and panel connectors.
- IOT based patient monitoring systems too will find use in applications for our Minitex pwr connector solutions.
- [4.2mm standard WTB solutions & 4.2mm Blind mate panel mount connectors](#)

## Hospital Beds

- Power control boards which controls actuators would find scope for wire to wire and wire to board applications for electronics hospital beds
- These interconnection requirements, will find our below Minitex Pwr variants useful.
  - [3mm & 4.2mm standard & Blind mate connectors](#)
